

Station Casinos Announces Third Quarter 2015 Results

LAS VEGAS--([BUSINESS WIRE](#))--Station Casinos LLC ("Station," "we" or the "Company") today announced the results of its operations for the third quarter ended September 30, 2015.

"Station Casinos posted 4.5% growth in net revenues and 14.0% growth in Adjusted EBITDAM for the third quarter," said Marc Falcone, Executive Vice President, Chief Financial Officer and Treasurer. "We had another strong quarter highlighted by revenue growth in nearly every category, continued operating efficiencies and steadily improving margins. We are proud to report that this is our eighteenth consecutive quarter of Adjusted EBITDAM growth."

Highlights

Net revenues increased 4.5% and Adjusted EBITDAM increased 14.0% compared to the prior year period.
Adjusted EBITDAM margin for the third quarter of 2015 was 31.5%, a 260 basis point improvement compared to the prior year period.
Tenth consecutive quarter of year-over-year net revenue growth and eighteenth consecutive quarter of year-over-year Adjusted EBITDAM growth.
Las Vegas net revenues increased 2.8% and Adjusted EBITDAM increased 7.9% compared to the prior year period.
Native American management fees increased 55.4% compared to the prior year period.

Consolidated Results of Operations

The Company's consolidated net revenues for the third quarter ended September 30, 2015 were \$323.6 million, an increase of \$13.9 million, or 4.5%, compared to the prior year period. Consolidated Adjusted EBITDAM for the quarter increased \$12.5 million, or 14.0%, to \$102.1 million, and our Adjusted EBITDAM margin increased 260 basis points to 31.5%. Net revenue at our Las Vegas properties increased 2.8%, while Adjusted EBITDAM increased 7.9% and Adjusted EBITDAM margin improved 140 basis points to 29.2%. In Las Vegas, the economy continued to show momentum and we experienced broad based consumer spending increases in both our gaming and non-gaming areas. We also continue to see solid results in the operating performance at our two Native American properties, which drove a 55.4% increase in management fees to \$16.6 million for the quarter.

For the nine month period ended September 30, 2015, the Company's consolidated net revenues were \$1.0 billion, a 4.8% increase compared to the first nine months of 2014. Adjusted EBITDAM was \$342.3 million for that period, a \$37.5 million, or 12.3%, increase compared to the prior year period and Adjusted EBITDAM margin increased 230 basis points to 34.1%. Native American management fees increased \$12.0 million to \$45.3 million for that same period.

"We achieved strong performance at our Las Vegas properties, which experienced increased guest spending as the economy continued to gain momentum," Falcone stated.

Adjusted EBITDAM is not a generally accepted accounting principle ("GAAP") measurement and is presented solely as a supplemental disclosure because the Company believes that it is a widely used measure of operating performance in the gaming industry and is a principal basis for valuation of gaming companies. Adjusted EBITDAM is further defined in footnote 1 and a reconciliation of Adjusted EBITDAM to net income, the most comparable GAAP measure, is included in the financial information attached hereto.

Balance Sheet Highlights

As of September 30, 2015, the outstanding principal balance of the Company's long-term debt was \$2.1 billion (excluding a non-recourse land loan of \$114.1 million) and cash and cash equivalents were \$96.9 million. As of September 30, our debt (net of excess cash) to Adjusted EBITDAM ratio was 4.5 times, excluding the non-recourse land loan.

This press release contains certain forward-looking statements with respect to the Company and its subsidiaries which involve risks and uncertainties that cannot be predicted or quantified, and consequently, actual results may differ materially from those expressed or implied herein. Such risks and uncertainties include, but are not limited to the strength and sustainability of the recovery from the recent economic downturn, and the effects of the economy generally, and in particular in Nevada, on consumer spending and our business; the effects of intense competition that exists in the gaming industry; the risk that new gaming licenses or gaming activities, such as expansion of internet gaming, are approved and result in additional competition; our substantial outstanding indebtedness and the effect of our significant debt service requirements on our operations and ability to compete; the risk that we will not be able to refinance our outstanding indebtedness or obtain necessary capital to finance any development or investment projects that we may decide to undertake in the future; the impact of extensive regulation from gaming and other government authorities on our ability to operate our business and the risk that regulatory authorities may revoke, suspend, condition or limit our gaming or other licenses, impose substantial fines or take other actions that adversely affect us; risks associated with changes to applicable gaming and tax laws that could have a material adverse effect on our financial condition; the impact of general business conditions including competitive practices, changes in customer demand and the cyclical nature of the gaming and hospitality business in general, on our business and results of operations; the impact of volatility in the capital markets, including fluctuations in interest rates, on our ability to refinance our debt, access additional capital and financial condition generally; adverse outcomes of legal proceedings and the development of, and changes in, claims or litigation reserves; risks, such as cost overruns and construction delays, associated with development, construction and management of new projects or the expansion of existing facilities; and other risks described in the filings of the Company with the Securities and Exchange Commission. In addition, there can be no assurances that we will be able to consummate the public offering of Class A Common Stock of Station Casinos Corp.

(1) Adjusted EBITDAM is a non-GAAP measure that is presented solely as a supplemental disclosure. We believe that Adjusted EBITDAM is a widely used measure of operating performance in our industry and is a principal basis for valuation of gaming companies. We believe that in addition to operating income, Adjusted EBITDAM is a useful financial performance measurement for assessing our operating performance because it provides information about the performance of our ongoing core operations excluding management fee expense, non-cash expenses, financing costs, and other non-operational or non-recurring items. Adjusted EBITDAM includes net income from continuing operations plus interest expense, net, depreciation and amortization, management fee expense, preopening expense, share-based compensation expense, a donation to UNLV, asset impairment, write-downs and other charges, net, loss on extinguishment of debt, and change in fair value of derivative instruments, and excludes gain on Native American development and Adjusted EBITDAM attributable to the noncontrolling interests of MPM. To evaluate Adjusted EBITDAM and the trends it depicts, the components should be considered. Each of these components can significantly affect our results of operations and should be considered in evaluating our operating performance, and the impact of these components cannot be determined from Adjusted EBITDAM. Further, Adjusted EBITDAM does not represent net income or cash flows from operating, investing or financing activities as defined by GAAP and should not be considered as an alternative to net income as an indicator of our operating performance. Additionally, Adjusted EBITDAM does not consider capital expenditures and other investing activities and should not be considered as a measure of our liquidity. In addition, it should be noted that not all gaming companies that report EBITDAM or adjustments to this measure may calculate EBITDAM or such adjustments in the same manner as we do, and therefore, our measure of Adjusted EBITDAM may not be comparable to similarly titled measures used by other gaming companies.
